

April 1, 2020

Dear resident/owner,

2020 Concrete, Pavement Reconstruction/Resurfacing Projects - Advance Notice

From April through October, the City of Louisville plans to replace portions of its aging infrastructure. You are receiving this advance notice because you are near one or more concrete and/or asphalt replacement projects.

Concrete Replacement (Red/Cyan) – Please refer to the map on the back of this letter.

Concrete work will include removal/repair/reconstruction of walk, curb, inlet decks, intersection cross pans, curb cuts and handicap curb ramps that exhibit moderate to severe distress (e.g. settlement, large cracks, ponding, etc.) or are non-conforming to recognized standards (e.g. cross slope, detectable warning surface plates at curb ramps, etc.). Work will occur in individual or large block segments. Concrete replacement will occur on streets slated for pavement reconstruction and resurfacing.

In the event that the curb and gutter or sidewalk needs to be replaced in front of a driveway or parking spot, please refrain from driving/parking on new concrete for **seven days** to allow the concrete to cure.

Pavement reconstruction (Red) includes complete replacement of asphalt mat with subgrade preparation and crown adjustment. Work will occur in 1-3 block segments. During reconstruction there may be limited or no access to the street until completion, weather permitting.

Pavement resurfacing (Cyan) includes either an individual or a combination of treatments such as asphalt milling, patching, leveling, and chip seal. Work will occur in individual or multiple block segments. During construction hours access may be limited. On-street parking will not be permitted during working hours (7 am - 5 pm).

Public Works staff will coordinate proposed activities to reduce the level of inconvenience as much as possible. During construction, access will be restricted/limited. During non-construction periods, the contractors will attempt to reduce the street and alley closure areas to accommodate partial use of the streets/alleys. Open excavations will be backfilled daily, steel plated, or fenced securely to protect the public.

Stay informed

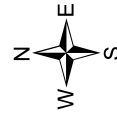

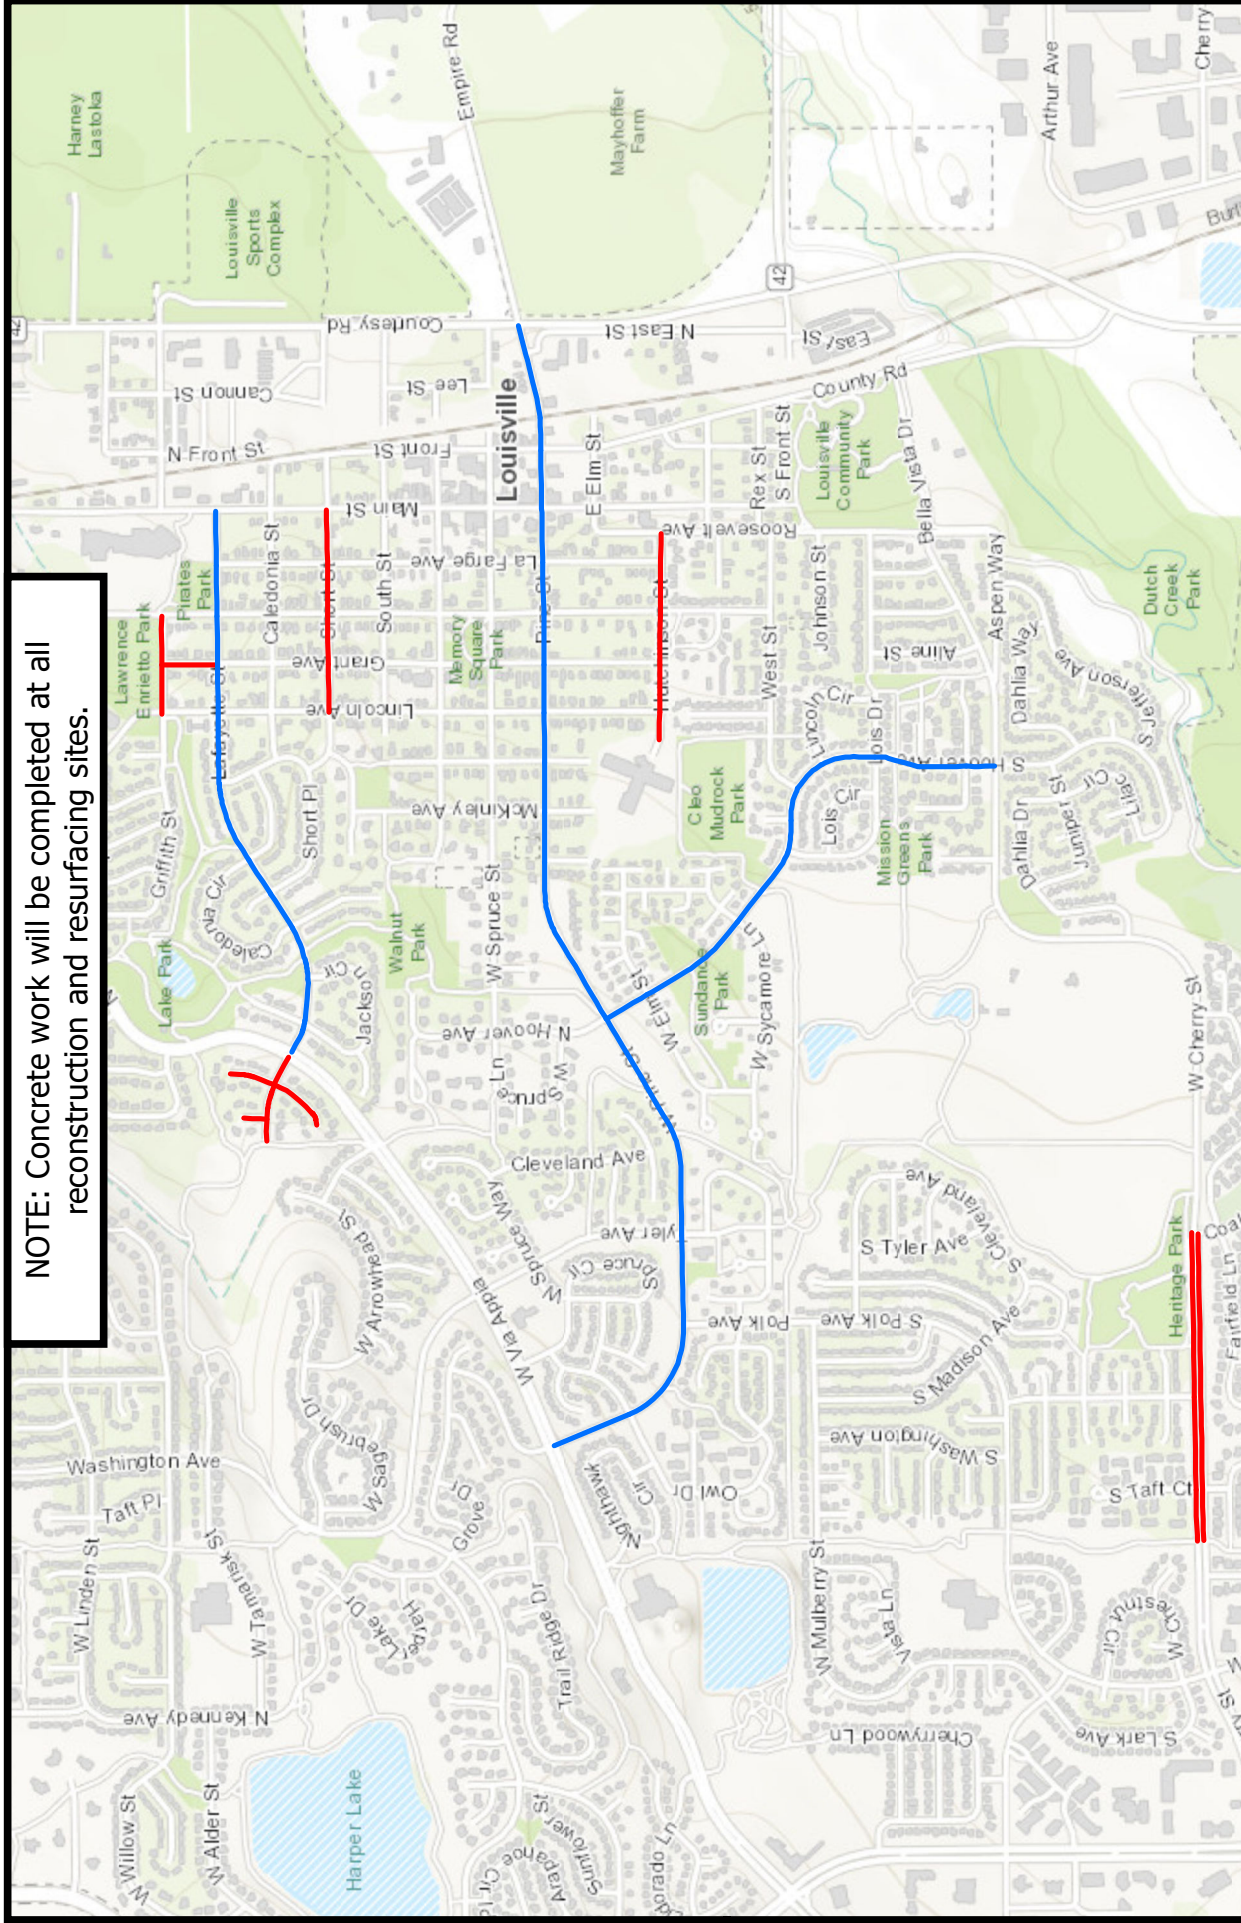

Due to COVID-19, we have decided to suspend neighborhood meetings until further notice. If you would like to receive further notices about this work, please visit www.LouisvilleCO.gov/Construction and share your email address (or a phone number if you don't have email). You can also check the website for weekly updates.

If you have any questions, please contact me by email gnettleton@louisvilleco.gov. If you do not have access to email, please leave me a voicemail on 303-335-4603 and I will return your call.

Thank you in advance for your patience and cooperation.

Geoff Nettleton, P.E., Civil Engineer III

NOTE: Concrete work will be completed at all reconstruction and resurfacing sites.
