#### **I. GENERAL DESCRIPTION**

The City of Louisville, Parks and Recreation Department, is requesting proposals from qualified irrigation companies to repair and replace approximately 500 feet of sleeved irrigation mainline in the right-of-way.

## II. SCOPE OF SERVICES

The existing 2" PVC mainline will need to be removed from the sleeve which extends the approximate 500 feet. Afterwards, 2" HDPE pipe is to be pulled through the existing sleeve along with a pull cord for future use if needed. The valve and common wires also run through this sleeve. If unable to remove and replace the mainline without damaging the existing wires, new wires will need to be pulled through the sleeve as well. Splice boxes are required if wires need to be replaced.

The HDPE installed mainline will then need to be reconnected to a PVC mainline. Appropriate electro fusion couplers and transition joints must be used. Owner to approve all material used such as: HDPE pipe, wire, transition joints, etc.

The successful contractor will be required to obtain a right-of-way permit, at no cost. If traffic control is deemed necessary, the contractor will be responsible for obtaining traffic control and adhering to direction provided by the City.
