COUNTY COVID-19 IMPACT PLANNING REPORT

Boulder County, Colorado (FIPS 08013)

Source:

In 2018, Louisville completed an analysis of the racial/ethnic composition of Louisville using 2010 Census Data and 2017 ACS Census Data. Since 2010, Louisville has grown 14.8% to a total population of 21,129 people. Overall, Louisville's growth has occurred primarily in new residential developments in the northeast portion of the city. Louisville's percentage of minority populations did not change substantially in this timeframe, remaining at around 14%.

According to the 2017 data, Louisville has an overall minority population of 13.6%. The Hispanic population in Louisville is 5.6%. None of the City's census tracts meet the definition of minority neighborhood by exceeding the overall City minority percentage by 20% or more. The population in Louisville below the poverty level is 5.8%. One census tract, 130.05, is considered a poverty concentrated area, with a poverty level that exceeds 20% of the city as a whole. 7.9% of the population in Louisville has a disability. There is one census tract, 129.04, which may have a concentration of disabled individuals that exceeds 2% of the city's total population. While this census tract also includes a portion of the neighboring community of Lafayette, for the purposes of this plan, the City will use the assumption that this area has a

concentration of disabled individuals. The city will continue to monitor this area as updated data is released by the census. According to information provided by DRCOG last updated in 2016, TAZs 105270, 105400, 105430, and 105570 are considered environmental justice areas.
