

Zoonotic Disease Report August 23 – August 29, 2020 (Week 35)

Executive Summary

- CDPHE reports four human cases of West Nile virus cases. Boulder County continues to report a single case from last week.
- Boulder County has recorded five positive West Nile virus mosquito samples this year. One positive sample was recorded from Week 35 from Zone 2 (Longmont). Infection rates and vector index remain low, but residents should be reminded to protect themselves from mosquito bites.
- Positive West Nile virus mosquitoes have been identified from Boulder (5), Delta (13), Denver (1), Larimer (36), La Plata (1) and Weld (5) counties.
- Statewide, 70 specimens have tested positive for rabies in 2020. Boulder County reports seven positives for the year.
- Nine bats were submitted for rabies testing, one tested positive.
- No samples were submitted for plague, tularemia, or hantavirus.

West Nile Virus Activity by State – United States, 2020 (as of August 25, 2020)

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health by other agencies or private veterinary practices.
- 'Positive Vectors' include only samples that have tested positive. Some samples submitted may be deemed untestable.
- 'Submitted Vectors' denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
