

Priority 4 – Residential Through Streets

Residential streets receive one pass after arterials, collector streets, streets that serve schools and hospitals, and residential loop streets.

Our goal is to make streets passable, not totally clear them of snow. The City will push snow to the side of the street. With that in mind, if local streets are passable and plowing the street will make it worse, or it will merely push snow into driveways that people have already shoveled, our crews will leave them alone. There is nothing worse than having to clear your driveway twice in one day because a snowplow filled in all your hard work.

For residents, snowy weather brings slippery sidewalks. City code requires property owners to clear sidewalks of ice and snow within 24 hours of the last accumulated snowfall. Please be sure to keep your sidewalks passable for pedestrians. Thank you.
