

Wildfire Hazard & Risk Assessment Of Louisville Public Lands – RFP Q&A

Project Number: 201110-532909

Updated: 10/14/22

(1) Do you want lump sum amounts for each main numeric category (e.g., 1 - 7), or do you want lump sum amounts for each alphabetic subcategory (e.g., A - I) as well?

Please provide a lump sum amount for each main numeric category (1-7).

(2) Would you like a 1-pager on each team member added to the proposal? If so, which section should we add this to?

Your inquiry influenced us to add “Page 6, paragraph 2.g., Submittal Instructions & Evaluation Criteria, delete the phrase “How your project goals meet or exceed the City’s project goals.” and replace with the phrase “Project Team Information. Member’s roles and resumes, not included in two (2) page limit.” to the recently submitted Addendum No. 1.

(3) What was the amount the City of Louisville paid AnchorPoint for their contract in 2012?

AnchorPoint received compensation of \$4,800 for the City of Louisville Open Space Wildfire Hazard and Risk Assessment document.

(4) What is the budgeted amount for this current project? I could not find any reference to an amount in your CIP, Open Space Minutes, or City Council Minutes.

Currently there is not a budgeted amount for this project. Under current market conditions we are trying to get a better idea of a reasonable price point as listed under Submittal Instructions & Evaluation Criteria, 1.a., “The intent is to establish lump sum, pricing as a starting point and basis to move forward.”
