

# ***Sustainability Advisory Board***

## ***Agenda***

**April 16, 2025**

**Spruce Conference Room, City Hall**

**749 Main St**

**6:30 PM**

*Members of the public are welcome to attend and give comments remotely; however, the in-person meeting may continue even if technology issues prevent remote participation.*

- You can call in to +1 833 928 4610 (Toll Free)  
Meeting ID **#846 2865 9916**  
Meeting Password # **239019**
- You can log in via your computer. Please visit the City's website here to link to the meeting: [www.louisvilleco.gov/sustainabilityboard](http://www.louisvilleco.gov/sustainabilityboard).

*The Board will accommodate public comments during the meeting. Anyone may also email comments to the Board prior to the meeting at [HMiller@LouisvilleCO.gov](mailto:HMiller@LouisvilleCO.gov).*

- I. Call to Order
  - a. Nisa is the secretary for April
- II. Roll Call
- III. Approval of Agenda
- IV. Approval of Minutes
- V. Public Comments on Items Not on the Agenda
  - a. 3 minutes per comment.
- VI. Administrative Tasks
  - a. Reminder for Earth Day, Every Day LSAB tabling opportunity
- VII. Staff Updates – 10 minutes
- VIII. Discussion Item: Comprehensive Plan Update- 50 minutes
  - a. Jeff Hirt, Planning Manager

---

*Persons planning to attend the meeting who need sign language interpretation, translation services, assisted listening systems, Braille, or taped material, should contact the City Clerk's Office (303.335.4536 or 303.335.4574) or [ClerksOffice@LouisvilleCO.gov](mailto:ClerksOffice@LouisvilleCO.gov). A forty-eight-hour notice is requested.*

*Si requiere una copia en español de esta publicación o necesita un intérprete durante la reunión, por favor llame a la Ciudad al 303.335.4536 o 303.335.4574 o email [ClerksOffice@LouisvilleCO.gov](mailto:ClerksOffice@LouisvilleCO.gov).*

## Memorandum

**To:** Louisville Sustainability Advisory Board

**From:** Hannah Miller, Sustainability Manager  
Logan Johnson, Sustainability Specialist

**Date:** April 16, 2025

**Re:** Staff Updates

---

### **City Manager Update**

We're excited to welcome Diana Langley as Louisville's new City Manager! If you see her around, please give her a warm welcome as she gets to know the community.

### **Internal Decarbonization Plan Implementation**

A new Project Manager will be joining the City on April 21 to lead the implementation of the Internal Decarbonization Plan. They will be responsible for developing the RFPs (Requests for Proposals) needed to move the project forward. The Sustainability team will support the creation of these RFPs.

### **Budget Recommendations**

Staff are actively collaborating as part of the 2025 budget process. Louisville follows a biennial (two-year) budget cycle, and this year is focused on critical funding requests only.

### **Upcoming Events**

- Parco Dello Zingaro (PDZ) Hard-to-Recycle Event  
Originally scheduled for earlier this spring, the PDZ event was postponed due to inclement weather. Staff are currently exploring rescheduling options.
- Boulder County Solar Switch (formerly Switch Together)  
A solar co-op information session will be held in partnership with East Boulder County jurisdictions to help residents learn more about joining the program.  
April 17 | Lafayette Public Library | 6:00 p.m.
- Earth Day, Every Day  
Celebrate sustainability with us at this fun, family-friendly event! Allison is coordinating an interactive activity for our table.  
April 26 | Lafayette's Outdoor Classroom | 10:00 a.m.
- Electrification Expo  
Learn about clean energy technologies and explore ways to electrify your home and lifestyle. Held in collaboration with Lafayette and Superior.  
May 10 | Superior Community Center | 12 p.m.

**Colorado Resilience (CORE) Intern**

Sustainability staff will be onboarding an intern at the end of April to support several resilience and adaptation initiatives within the city.

**Transformative Landscape Challenge (TLC) Grant with Resource Central**

Staff were awarded the Turf Replacement and Landscape Change (TLC) Grant in partnership with the Parks, Recreation, and Open Space (PROS) Department. In collaboration with Resource Central, the project will focus on removing 1,600 square feet of turf at the Louisville Arboretum and converting the area to native, water-wise landscaping.

As part of the project, educational signage will be installed to inform visitors about the benefits of native landscaping. PROS staff are also actively working in the same area to remove additional turf and replace it with low-water grasses, supporting the City's broader water conservation and sustainability goals.

# Sustainability Advisory Board

April 2025

Allison Kay, Chair

Hannah Miller, Sustainability Manager

# Agenda

- I. Call to Order
  - a. Nisa is the secretary for April
- II. Roll Call
- III. Approval of Agenda
- IV. Approval of Minutes
- V. Public Comments on Items Not on the Agenda
  - a. 3 minutes per comment.
- VI. Administrative Tasks
  - a. Reminder for Earth Day, Every Day LSAB tabling opportunity
- VII. Staff Updates – 10 minutes
- VIII. Discussion Item: Comprehensive Plan Update
  - a. Jeff Hirt, Planning Manager
- a. Public Comment (3 minutes per comment)
- b. LSAB Discussion and Direction
- I. Discussion Item: LSAB\_ City Council Collaborative Mtg Debrief
  - a. Allison Kay, LSAB Chair
  - b. LSAB Discussion
- II. Discussion and Direction Item: LSAB Budget Recommendations
  - a. Allison Kay, LSAB Chair with support from Hannah Miller, Sustainability Manager
  - b. Public Comment (3 minutes per comment)
  - c. LSAB Discussion and Direction
- III. Adjourn

## Discussion Item: Comprehensive Plan Update- 50 minutes

- Jeff Hirt, Planning Manager
- Public comment (3 minutes per comment)
- LSAB Discussion and Direction

# **Sustainability Advisory Board**

*April 16, 2025*

## **Citywide Comprehensive Plan Update**

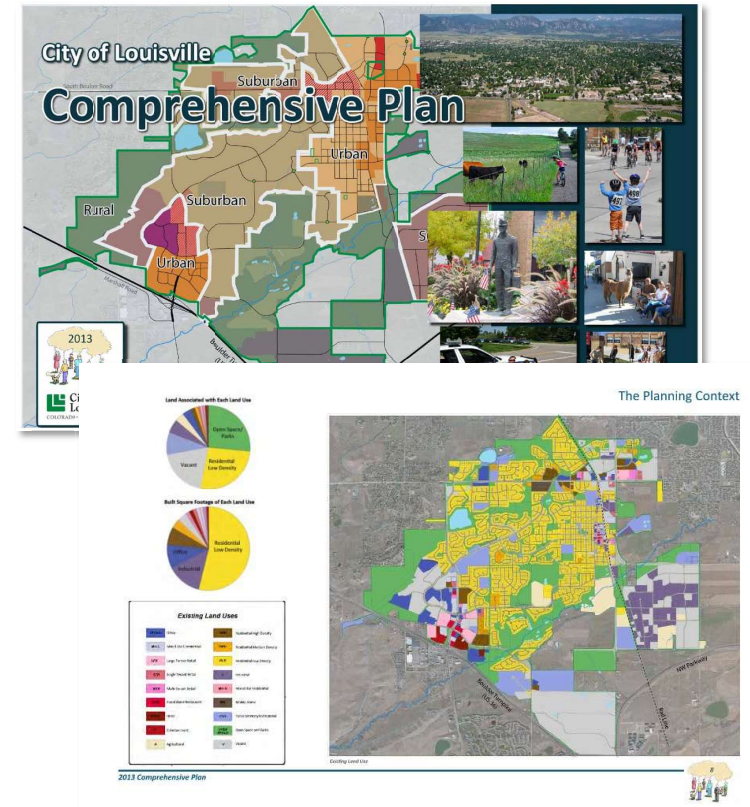

# Meeting Purpose

1. LSAB Comprehensive Plan project update
2. Targeted questions to inform Plan drafting

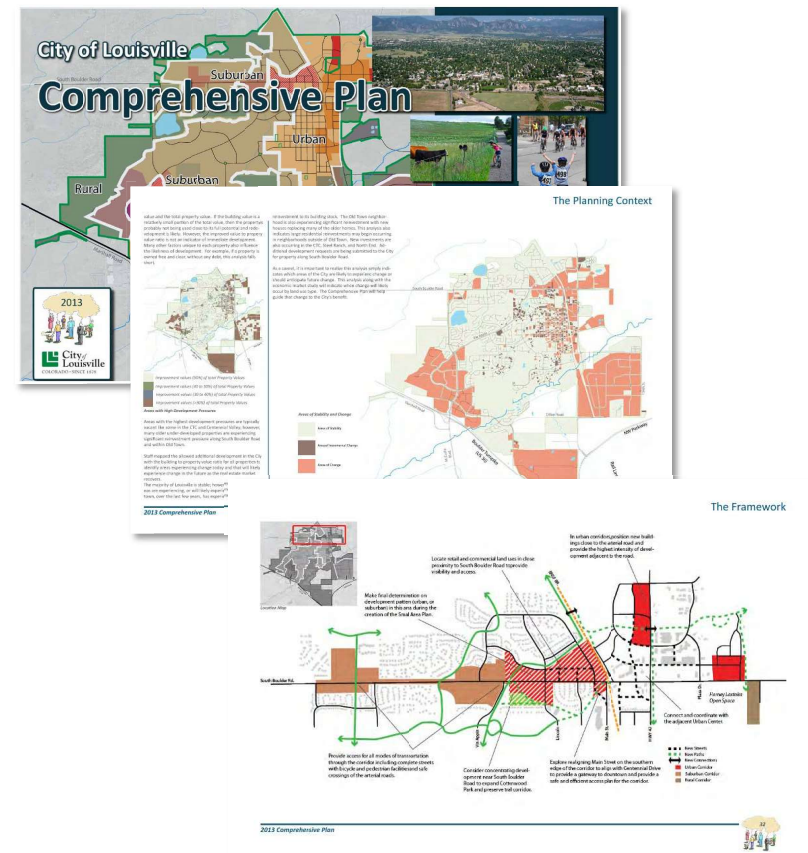

# Plan Overview

- Citywide policy that focuses on land use and development but addresses a wide range of topics.
- Not zoning or regulatory, but important foundation for City decisions related to land use, development, capital projects, programming, etc.
- Required update every ten years (last update 2013)

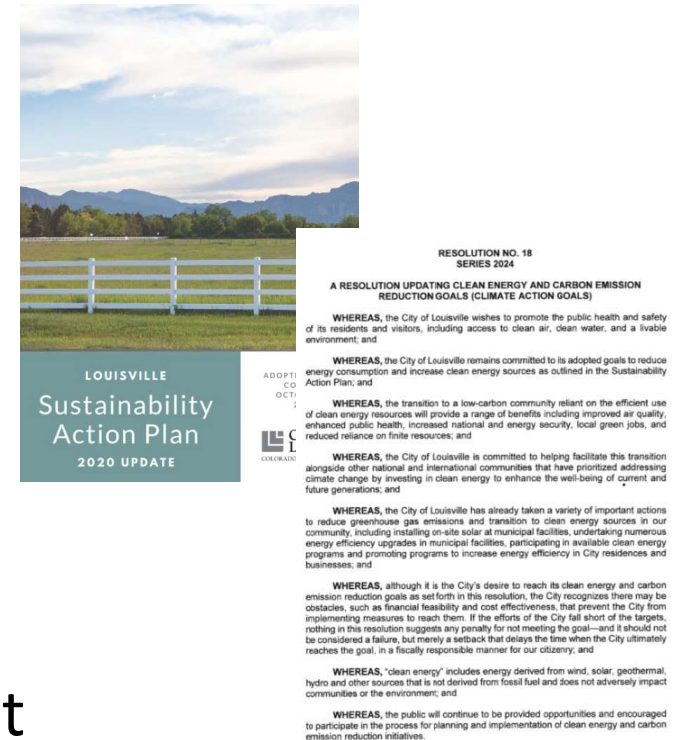

# Comp Plan Interface with LSAB

- Identification of areas of change related to land use and development
- Statement of priority goals and strategies related to environmental sustainability

# LSAB Feedback (January 2024)

- Environmental sustainability as overarching lens
- Align with ongoing City efforts – decarbonization, energy, resilience, climate action.
- Support multimodal transportation connectivity
- Support for more mixed use development

# Progress to Date

- Early 2024 kickoff
- Three rounds of community engagement in 2024 with over 2,000 residents participating
- Vision and Values statements endorsed by City Council
- Future growth scenarios shared with community late 2024

## Comprehensive Plan Vision Statement

*Louisville is committed to being an equitable, resilient, and sustainable community where everyone has the opportunity to thrive – now and for future generations. We strive for a vibrant future where Louisville will evolve and adapt to change in ways that respect our past and support our high quality of life.*

## Comprehensive Plan Core Values

- Community Character: We value a balanced approach to change that embraces and enhances our community character.
- Community Connectivity: We value knowing our neighbors through a community network that is inclusive and inter-connected.
- Environmental Sustainability: We value climate action, environmental resilience, and adaptation to promote environmental sustainability for the enduring vitality of our community.
- Economic Vibrancy: We value thriving and dynamic businesses that support and engage the community.
- Community Places: We value community places to bring people together and support healthy living including parks, open spaces, and other public places.
- Civic Leadership: We value transparent, collaborative, and fiscally responsible local government.

# City Council Direction - Land Use & Development Framework

- Focus change in defined opportunity areas (areas of change/areas of stability)
- Implementation of Louisville Housing Plan
- Support for mixed use development in some locations
- Higher intensity development closer to US 36

## LEGEND

--- Louisville boundary

— Major road

— Trails

▨ Opportunity Areas

① South Boulder Road Corridor

② Downtown

③ McCaslin Corridor

④ Redtail Ridge

### Existing Place Types

■ Commercial

■ Mixed Use Retail

■ Low Density Residential (1-10 DU)

■ Mid Density Residential (10-20 DU)

■ Mixed Use/Mid Density Residential (20-30 DU)

■ Mixed Use/High Density Residential (30-40 DU)

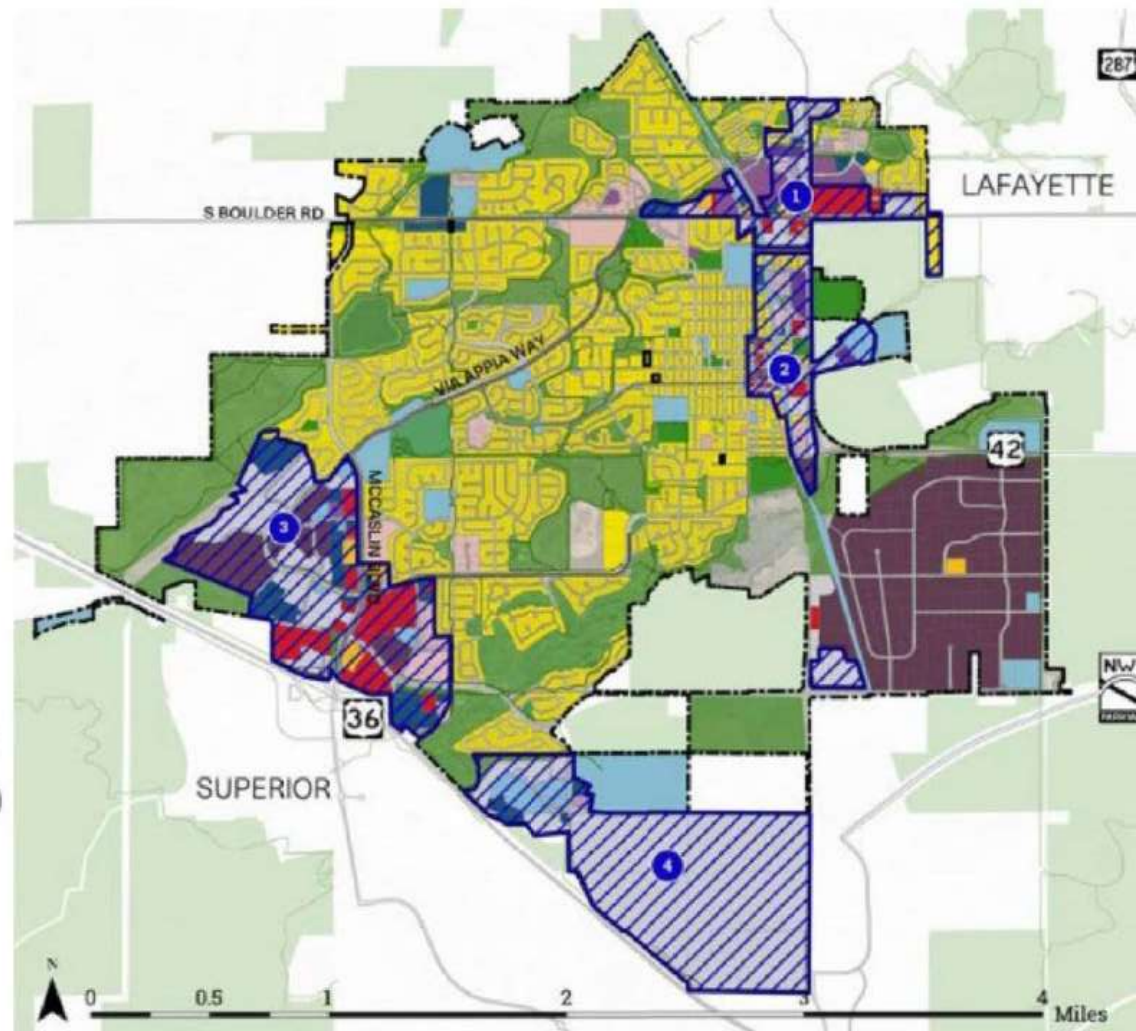

■ Park/Plaza/Open Space

■ Public Use

■ Industrial Mixed Use

■ Industrial Office/R&D

■ Office

- Decarbonization
- Recovery and Resilience
- Biodiversity
- Mixed Use, Transit Oriented Development
- Transportation and Mobility
- Core Community Services

## Summary of Potential LSAB Related Goals and Strategies in the Comprehensive Plan

| Draft GOAL Topic           | Draft STRATEGY Topic                                                                                                                                                                                                                                                                                                                                                                     |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Decarbonization         | <ul style="list-style-type: none"><li>• Advance the Community Decarbonization Plan.</li><li>• Update Sustainability Master Plan.</li><li>• Establish a Climate Action Plan.</li><li>• Evaluate improvements to green energy building codes.</li><li>• Support Greenhouse Gas Emissions and Reduction Targets (Reso 18, 2024).</li><li>• Support City's waste management goals.</li></ul> |
| 2. Recovery and Resilience | <ul style="list-style-type: none"><li>• Support natural hazard mitigation measures on balance with biodiversity goals.</li><li>• Promote water conservation with private development and City facilities.</li><li>• Support local agriculture and food production.</li></ul>                                                                                                             |
| 3. Biodiversity            | <ul style="list-style-type: none"><li>• Prioritize ecosystem health and native species on public open space lands and other appropriate areas.</li><li>• Support improved tree canopy.</li><li>• Support acquisition of additional open space areas to address biodiversity goals.</li></ul>                                                                                             |

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>4. Mixed Use, Transit Oriented Development</b> | <ul style="list-style-type: none"> <li>• Promote mixed use development (e.g., residential with commercial nearby) in areas close to transit.</li> <li>• Promote a wider range of housing choices so people can live closer to where they work.</li> </ul>                                                                                                                                                                                                                 |
| <b>5. Core Community Services</b>                 | <ul style="list-style-type: none"> <li>• Promote a regional approach to addressing the city's environmental sustainability goals and strategies.</li> <li>• Update City's development code to address environmental sustainability topics.</li> <li>• Address the resiliency of City infrastructure related to topics like water conservation, flooding, fires, energy efficiency, etc.</li> </ul>                                                                        |
| <b>6. Transportation and Mobility</b>             | <ul style="list-style-type: none"> <li>• Support multimodal transportation options addressing all forms of transportation with an emphasis on automobile trip reductions by:             <ul style="list-style-type: none"> <li>○ Locating mixed use development near transit.</li> <li>○ Identifying key missing transportation connections to build as redevelopment occurs.</li> <li>○ Supporting a future rail station in Downtown Louisville.</li> </ul> </li> </ul> |

## Next Steps

1. Public review draft early July
2. City Council adoption planned for late Summer 2025
3. Development Code update scoping starts immediately after Comprehensive Plan adoption

## Requested LSAB Feedback

1. What are the most important things to capture within LSAB's role in describing the Plan's goals and strategies?
2. What goals and strategies are missing from this initial list related to environmental sustainability?

[engagelouisvilleco.org/comp-plan](https://engagelouisvilleco.org/comp-plan)

## **Discussion Item: LSAB\_City Council Collaborative Mtg Debrief- 15 minutes**

- Allison Kay, LSAB Chair
- LSAB Discussion

## Discussion Item: LSAB Budget Recommendations- 25 minutes

- Allison Kay, LSAB Chair with support from Hannah Miller, Sustainability Manager
- Public comment (3 minutes per comment)
- LSAB Discussion and Direction

# Discussion Item: LSAB Budget Recommendations- 25 minutes

Allison's submission for budget recommendations.

- \$100,000 Full Time Sustainability Communications Manager to oversee sustainability communications and assist in grant applications and reporting.
- \$15,000 Sustainability Event Budget to host a large, impactful sustainability event that engages the community and promotes eco-friendly practices. This would be similar to Earth Day, Every Day or Ecotoberfest.
- \$10,000 Community Outreach and Communication Budget to create community signage, flyers and social media outreach to share with the community.
  - Yard Signs at Morrell Printing in Lafayette cost \$23.92 each. If we estimate about 350 signs for 8,582 households (~1 in 25 households would have a sign), totaling ~\$9,130 with taxes.

# LSAB May 2025 Meeting

- Discussion Items for Next Meeting
  - Budget Memo Approval
  - Climate Action Plan Examples
- Adjourn

## Attachment 1: Comprehensive Plan Goals and Strategies (for LSAB)

The purpose of this document is to seek input from the LSAB on the Comprehensive Plan's potential goals and strategies. The table below reflects potential goals and strategies related to LSAB's role as topics that don't yet have their language refined. These will evolve and be part of a broader articulation of City goals and strategies on a range of topics in the Plan.

Please review the content in the table below and be ready to discuss while considering the following questions:

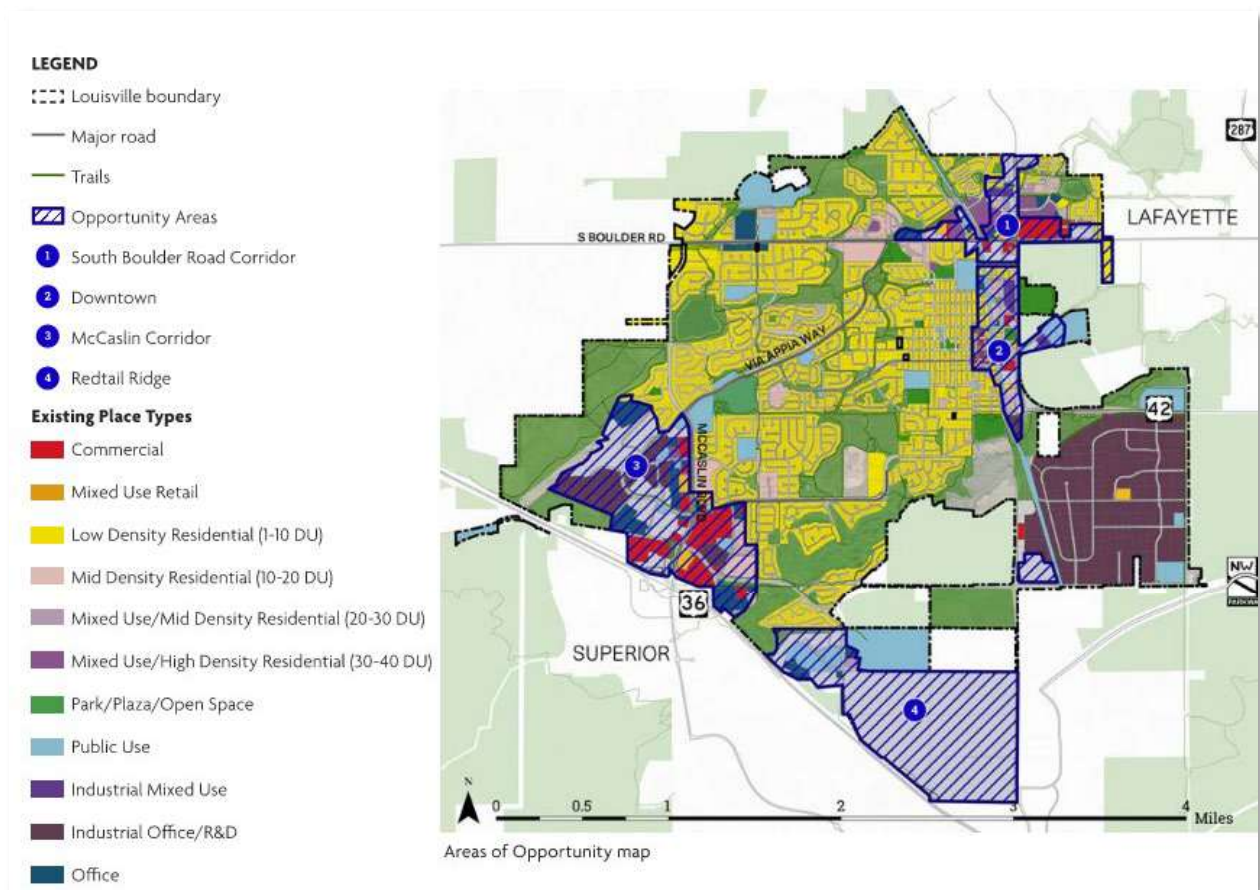

- *What are the most important things to capture in describing the goal or strategy in the Comprehensive Plan?*
- *What goals and strategies within LSAB's role are missing from the list below that should be included in the Comprehensive Plan?*

| Summary of Potential LSAB Related Goals and Strategies in the Comprehensive Plan |                                                                                                                                                                                                                                                                                                                                                                                          |

## Attachment 2: Louisville Comprehensive Plan Draft Future Land Use Framework

The Comprehensive Plan will include a future land use framework that acts as City policy for land use decisions. This will include a citywide map of desired future land uses and accompanying descriptions of different place types (e.g., low density residential, commercial, parks, etc.). The Plan will address the entire city, but with more granular recommendations for areas more likely to change (“Opportunity Areas”). The map below is the current draft that shows such areas of change. In early 2025, Planning Commission and City Council provided direction to address future land uses within each of the four areas of change as summarized in the table below. These groups also provided direction that the Plan should provide policies supporting some limited, context sensitive redevelopment in the places outside of the areas of change.

| Comprehensive Plan Draft Future Land Use Framework – March 2025 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 4. Redtail Ridge                                                | <ul style="list-style-type: none"> <li>• Mid-density residential and mixed-use residential uses at some locations, opportunity to consider 3 or 4 stories.</li> <li>• High-density residential near relocated hospital site and along US 36; opportunity to consider 4-stories, consider transit connections.</li> <li>• Propose mid- to high-density housing inter-mixed with office, R&amp;D and industrial uses when appropriate to support jobs-housing balance and vibrancy.</li> <li>• Consider a community green area, green corridor and trails network to promote livability/workability.</li> </ul> |

**SUBJECT: COMPREHENSIVE PLAN UPDATE**

**DATE: APRIL 16, 2025**

**PRESENTED BY: JEFF HIRT, AICP, PLANNING MANAGER**

**PURPOSE**

The purpose of this agenda item is to update the LSAB on the status of the [Comprehensive Plan](#) (“Plan”) and request targeted feedback on the Plan’s goals and strategies.

**BACKGROUND**

The City is updating its Comprehensive Plan. The Plan is adopted by City Council and required by state law. The Louisville Municipal Code (LMC) Section 17.64.050 also requires a Plan update at least every ten years. The last Plan update was in 2013. The Plan update is an opportunity for the community to refresh the City’s overall vision, values, and policies on a range of topics including but not limited to land use, development, and infrastructure. The time horizon the Louisville Comprehensive Plan will address is about 20 years. The Plan is not the City’s official zoning map and is not regulatory, but it does articulate official City policy that guides a range of decisions.

The Community Development Department is managing the Plan update in close coordination with City Council, Planning Commission and numerous other City boards, commissions, and departments with a consultant team led by Design Workshop with subconsultants Fehr and Peers (transportation), Economic and Planning Systems (economics analysis), and Spirit Environmental (sustainability, resilience, etc.).

The project is over half complete with a target adoption date of late Summer 2025. To date, several thousand residents have provided input on the plan. This input guided development of the Plan’s [Vision Statement and Core Values](#) and is guiding the Plan’s drafting. City Council and Planning Commission have also provided direction on the Plan’s future land use policies (see Attachment 2). Link 4 is a summary of the Plan’s most recent community engagement.

The Community Development Department is seeking input from several boards and commissions in March as the project team is starting to draft the Plan. Specifically, the primary purpose of these discussions is to address the goals and strategies of the Plan that are aligned with the board or commission’s role.

ISAB Discussion – January 17, 2024

The project team asked for LSAB input on the top issues the Plan should address when the project kicked off in early 2024. The LSAB had the following general comments:

- Environmental sustainability should be an overarching lens for all the Plan's policies.
- The Plan should align with the City's ongoing efforts related to decarbonization, promoting more energy efficient buildings, climate action goals, and resilience and emergency preparedness.
- The Plan should support multimodal transportation connectivity as part of environmental sustainability goals and strategies.
- The Plan should support a wider range of housing choices and opportunities close to transit to support a more diverse, inclusive community and address environmental sustainability goals like a reduction in the number of vehicle trips.
- The Plan should support climate wise, resilient City infrastructure addressing topics like water conservation and ability to withstand natural hazards like flooding and fires.
- The Plan should support nature based climate action solutions like addressing urban heat islands and biodiversity.

LSAB Related Goals and Strategies

Attachment 3 includes a summary table of the potential goals and related strategies that may be in the Comprehensive Plan related to the LSAB's role. Specifically, those goals or strategies related to environmental sustainability. These goals and strategies will be part of a broader Plan framework of goals and strategies that will be organized around the Vision Statement and Core Values.

The purpose of these goals and strategies is to articulate City policy on specific topics. The Plan is a policy document and not regulatory, but these statements will guide City decision making on a range of topics like budgeting, programming, capital projects, and land use decisions. The Plan will also inform the City's upcoming Parks, Recreation, and Open Space (PROS) Master Plan update.

**SCHEDULE AND NEXT STEPS**

The project team is seeking input from several City boards and commissions in March and April to inform the Plan's drafting, followed by continued discussions with Planning Commission and City Council. Following this input the project team is working towards an early July public review draft period. At that time there will be extensive community notification of the draft availability and opportunities for input. The target adoption of the Plan by City Council is late Summer 2025.

**REQUESTED LSAB FEEDBACK**

City staff are requesting feedback from the LSAB on the relevant draft, preliminary goals and strategies in Attachment 1. Specifically:

- What are the most important things to capture in describing the goal or strategy in the Comprehensive Plan?

**LSAB COMMUNICATION**

**SUBJECT: COMPREHENSIVE PLAN UPDATE**

**DATE: APRIL 16, 2025**

**PAGE 3 OF 3**

- What goals and strategies within LSAB's role are missing from the list below that should be included in the Comprehensive Plan?

**ATTACHMENTS/LINKS:**

6. [2013 Comprehensive Plan](#)

Started at 6:30

In attendance: Tiffany, Kristin, Kevin, Neesa, Aubrey, Todd, Allison

Staff: Logan, Hannah

Agenda Approved: Motion: Kristin, Second: Todd

Minutes; Motion: Tiff, Second: Aubrey

Public comment: RJ Harrington

Administration tasks:

- March 11th is the city council working session. Another group starts at 6pm. LSAB goes after.
- Hanna went through the draft presentation for the working session. (see packet)
- No changes to the draft were suggested.

Staff updates

- Allison asked why we're not doing Eco-tober anymore. Hannah explained declining enrollment, budget constraints.
- Group discussed getting involved with Lafayette's event. Potentially tabling or volunteering.
- There was discussion about adding a public comment section for the staff update for the next packet/meeting.

Around the horn

- Everyone shared ideas or topics that they're interested in.

Tiffany suggested that LSAB go out for social time after the next meeting.

Hannah mentioned a turf replacement challenge/grant from Resource Central at the arboretum. Hannah wants to know if LSAB is supportive. LSAB approved.

Public comment: John Cowley

LSAB approved Louisville moving forward with the grant, with the recommendation of having signage included.

Hannah presented the Climate Action Plan Intro and Project Timeline

Public comment: RJ and John Crowley

LSAB discussion

- A focus on measurement.
- Questions about whether we need to spend the full \$200k

Budget recommendations  
Public comment: RJ

Send suggestions to Hannah before March 12th.

Look at the March meeting agenda.

Adjourned at 8:22
