

ITEM: LMCA-000566-2025 – Amendment to Title 17 of the Louisville Municipal Code updating separation distance requirements for Natural Medicine Businesses from schools and child care facilities

PLANNER: Matt Post, AICP, Senior Planner

REQUEST: Approval of Resolution 11, Series 2025 recommending to the City Council approval of an ordinance amending Title 17 of the Louisville Municipal Code to update the method of measuring required separation distances between Natural Medicine Businesses and schools and child care facilities.

SUMMARY:

This ordinance update proposes a targeted amendment to the City’s Natural Medicine regulations to update the method of measurement for the required 1,000-foot separation between Natural Medicine Businesses and schools and child care facilities. The amendment aligns the City’s ordinance with [State law](#) and responds to a request from City Council to update the method of measurement.

This update does not alter the existing 1,000-foot distance requirement itself, nor does it revise zoning allowances, operational limits, or any other provisions of the City’s existing Natural Medicine ordinance.

The original staff report and supporting materials that led to the adoption of the City’s Natural Medicine regulations in December of 2024, including the ordinance, are available [here](#).

BACKGROUND:

In November 2022, Colorado voters approved Proposition 122, followed by the adoption of SB 23-290, which together established the state framework for Natural Medicine Businesses. The City of Louisville was required to adopt regulations to allow Natural Medicine Businesses by December 31, 2024. These laws provide that local governments may regulate the time, place, and manner of operation of such businesses, including reasonable distance requirements from sensitive uses such as schools and child care facilities.

Natural Medicine includes psilocybin/psilocyn and, if approved by the State under ongoing rulemaking, may also include dimethyltryptamine (DMT), ibogaine, and mescaline.

Natural Medicine Businesses include a Natural Medicine Healing Center, a Natural Medicine Cultivation Facility, a Natural Medicine Products Manufacturer, and a Natural Medicine Testing Facility.

In accordance with State law, Natural Medicine Businesses must be located at least 1,000 feet from licensed child care centers, preschools, elementary, middle, junior, and high schools. The State law indicates that those distances shall be measured by direct measurement from the nearest property line of the land used for a school or childcare facility to the nearest portion of the building in which natural medicine services are provided. The law also states, however, that local jurisdictions may vary those distance restrictions so long as the local jurisdiction does not unreasonably restrict the establishment of Natural Medicine Businesses.

With [Ordinance 1887, Series 2024](#), the City adopted a separation distance rule of measurement that varied from the State's approach, applying a property line-to-property line separation requirement. The 1,000-foot buffer is currently measured from the property line of the school or child care facility to the property line of the Natural Medicine Business. This method was adopted both for ease of administration in reviewing applications and to ensure that the Downtown area, where schools and child care facilities are in close proximity to commercial parcels, would remain subject to use restrictions.

The proposed update will include a method of measurement to establish a separation distance that more closely aligns with the language in the State law. Under the proposed ordinance, separation distance is determined by a direct pedestrian route, as measured from the property line of the school or child care facility to the nearest portion of the building containing the Natural Medicine Business use.

ANALYSIS:

Natural Medicine Healing Centers

Natural Medicine Healing Centers are licensed facilities that operate in a manner similar to medical or therapy offices. At these centers, trained facilitators administer Natural Medicine in a supervised setting and provide consultation and follow-up sessions with patients. Sessions typically take 4–6 hours, depending on the treatment. Facilitators are state-certified and trained in areas that include best practices, ethics, regulations, drug effects, and trauma-informed care. State law requires that transportation plans be in place for patients who have received Natural Medicine at a Natural Medicine Healing Center, since operating a motor vehicle while under the influence of Natural Medicine remains prohibited.

Staff anticipate that the proposed update will primarily affect the siting of Natural Medicine Healing Centers. These facilities are currently permitted in areas that also contain a relatively high concentration of schools and child care facilities. Under the City's prior property line-to-property line method of measurement, certain areas, particularly within Downtown Louisville, were not eligible for Natural Medicine Healing Centers. With the adoption of a measurement method based on the direct pedestrian route from property line to nearest portion of the building, it is likely that some areas of Downtown Louisville may become eligible for the establishment of a Natural Medicine

Healing Center. Zone districts where Natural Medicine Healing Centers may be established include:

- Administrative Office (A-O)
- Administrative Office-Transition (AO-T)
- Business Office (B-O)
- Commercial Community (C-C)
- Commercial Business (C-B)
- Residential Mixed-Use (MU-R)
- Planned Community Commercial (P-C)
- Permitted with Special Review Use:
 - Commercial Neighborhood (C-N)
 - Industrial (I)

Natural Medicine Cultivation, Products Manufacturing, and Testing Facilities Summary

The cultivation, manufacturing, and testing of Natural Medicine are light industrial activities that require specialized equipment and processes such as air handling systems, lighting, and chemical storage. Given the zoning districts where these uses are permitted, staff do not anticipate that the ordinance update will significantly affect the siting of these facilities, as there are minimal schools or child care facilities in these areas. Natural Medicine Cultivation, Products Manufacturing, and Testing Facilities are currently permitted in the Industrial (I) and Planned Community Industrial (P-I) zoning districts.

PROPOSAL:

The updated language will retain the 1,000 foot separation but establish a new rule for how the separation measurement is done based on what is a “direct pedestrian route”. The new language defines a direct pedestrian route as the distance measured along the most direct lawful pedestrian route from the nearest property line of the school or child care facility to the portion of the building or unit where the Natural Medicine Business will be located. The measurement must follow designated pedestrian routes, observe all traffic controls, and exclude trespassing or the use of alleys.

Louisville Municipal Code Sec. 17.16.340.B will be updated as follows. Words to be deleted ~~stricken~~; words to be added underlined:

- B. *Distance from schools.* No natural medicine business may be located within one thousand (1,000) feet of a child care center; preschool, elementary, middle, junior, or high school; or a residential child care facility. The distance shall be ~~determined by a direct measurement from the nearest property line of the land used for a school or for child care to the nearest property line of the site containing the natural medicine business.~~ calculated by measuring the most direct pedestrian route from the nearest property line of the land use to the nearest portion of the building or unit where the natural medicine healing center use will be located. The measurement shall reflect a safe and lawful walking path, without trespassing or use of alleys, and shall follow

designated pedestrian routes, and include right-angle crossings while observing all traffic signals and traffic regulations.
